- Portfolio Tracker
- Sniper Bot

— Introduction

Crypter was first conceptualized in August 2021. The idea was brought together after so many scam projects being shilled on Telegram and Facebook groups. Our quest to fight crypto scam starts here.

Nobody likes being scammed and getting rugpulled. Here at Crypter we will work hard to ensure that no projects will be shilled to the platform unless it's a legitimate one. Projects who will launch ads to the platform will undergo a vetting process. This will help eliminate the promotion of scam projects. Also with the help of the community everyone can look out for each other. Users who are caught sharing scam projects will be banned permanently so be carefull with your shiling.

Let's admit it, not everyone of Facebook like crypto, here at Crypter you can share anything related to crypto without your toxic Facebook friends reacting and commenting on your posts. We will create a safe space for everyone.

— The Crypter Protocol

On the Binance Smart Chain, our tokenomics have been designed to provide both stability and reward holders while sustaining the ecosystem development and growth. By simply holding the Crypter token users will be rewarded with 8% return in Binance Pegged BUSD for each transaction, this will be transferred automatically to the user's address and will happen every 60 minutes.

Crypter has a total supply of 1,000,000,000,000,000. Out of the total supply, 58% will be transferred to pre-sale and initial liquidity. 20% of tokens are sent to FEGEX presale. 9% for engage to earn rewards. 6% to private sale participants. 2% for paid promotions. The remaining 5% burned.

8% of every buy/sell is redistributed to all holders IN
Binance Pegged BUSD, which is auto paid every 60 Minutes

2% of every transaction is transferred into Liquidity Pool
for Pancakeswap to create a stable price floor

5% of every transaction is transferred into the dev and
marketing wallet. To be used for buy back as well.

— Core Values

We believe that decentralization holds the key to empowering people around the world to better safeguard their rights, and that we are helping the world move in this direction by accelerating the transition to adopting cryptocurrency with the help our platform and use cases.

Community plays a major part in the success of every project. Here at Crypter we value the opinions and suggestions of our holders. We aim to become the largest and most active community this space has ever seen. Together we believe that we can achieve something special.

Crypter will stay as long as there is a community behind this project, no matter how big or small it will be. With our planned use cases and strategies the moon is not our goal but it will be our starting point.

— **Binance Smart Chain**

What is Binance Smart Chain?

Binance Smart Chain (BSC) is a blockchain developed by the Binance Chain community that runs in parallel to the Binance Chain (BC). Unlike Binance Chain, BSC boasts smart contract functionality and compatibility with the rich Ethereum ecosystem through the Ethereum Virtual Machine (EVM).

The design goal of BSC was to achieve high transaction capacity, while introducing smart contracts into the ecosystem, enabling users to create DApps and other DeFi products. The BSC Network is powered by BNB, Binance ecosystem's native token and runs on a proof-of-stake (PoS) consensus model.

— Ecosystem

Social Network

A Facebook like platform for crypto lovers. Share your gains and losses. Flex your NFTs. Create private groups. Chat with your crypto friends. The first to implement an Engage to Earn system to reward our users.

WELCOME

Connect with your crypto friends all over the world. The largest social network for crypto enthusiasts.

The image shows a login form with a dark background. At the top, there are two tabs: 'Username Login' and 'Social Login'. Below the tabs are two input fields: 'Username' and 'Password'. To the right of the 'Password' field is a red 'Login' button.

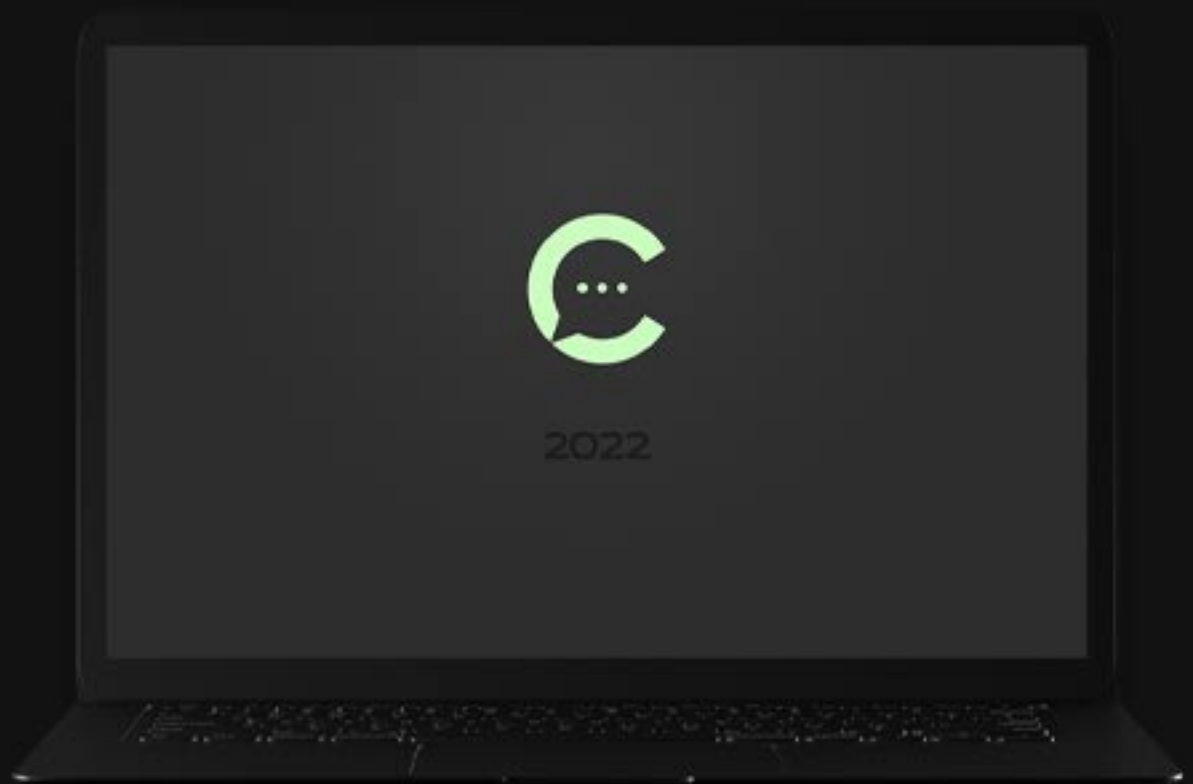

- SHARE**
Share what's new and life moments with your friends.
- DISCOVER**
Discover new people, create new connections and make new friends.
- 100% PRIVACY**
You have full control over your personal information that you share.
- MORE SECURITY**
Your account is fully secure. We never share your data with third party.

— Ecosystem

Portfolio Tracker

It lets you see the current value of your DeFi cryptocurrency tokens in one easy location. You can access all the data you need to make informed decisions and get the most out of your trades. Share your gains and losses with your friends.

— Ecosystem

Sniper Bot

Be the first to purchase new listings. This will be available only for top 200-500 (not yet final) holders, this is to ensure that the bot will perform smoothly.

(UI for this is just a draft, this will change)

— Others

Crypter Email Provider

This will be our own email that will be hosted on @crypter.gg. Perfect for those whitelisting contest. Have a separate email for your crypto related activities.

Wallet Integration, DEX and Fiat to Crypto

This will allow the user to swap inside the social network.

Android and iOS for Social Network

This will come around 2-3 weeks after launch.

Windows Messenger for Social Network

This will be just a Messenger app for Windows.

Crypter Whitelisting Platform

Due to several issues we experienced with SweepWidget why not make our own platform. This may come in 2-3 months after launch.

ChainQuest

This a fighting game similar to Tekken and StreetFighter.

More Features that will come in the Social Network

There will be Streaming, a Marketplace similar to Facebook. A referral system to reward users for inviting their friends over to Crypter. Crypter University. A private section for VIP members. Still a lot of features to be added, this whitepaer will be updated atleast once a month.

CRYPTER

Thank You
